BREAKING NEWS: Global Surveillance Agency Cracked Wide Open

In breaking news today, a leaked report has revealed the existence of a GLOBAL security intelligence agency which oversees the operations of ASIO, the CIA, MI5, MI6, NSA and all other key intelligence agencies across the world. According to the report, this top level security agency has been monitoring the communications of all citizens across the world, particularly children. The report claims all communications have been monitored closely for generations and in more recent times has been extended to texts, emails, tweets and Facebook posts. The most shocking claim made by the report is that the leader and brains of this operation is Mr Santa Claus (code name: Secret Santa).

The North Pole operations leak also contained damning photos of Santa's automated workshop and covert monitoring room.

As a precautionary measure, Citizens of the world have been asked to limit the use of social media and internet connected devices in the days leading up to the 25th December.

This image shows the magnitude of Santa's surveillance and toy manufacturing operations.

This contrived report has been brought to you by Online Digital Security. Merry Christmas everybody!
